

## Acoustic Solutions Manufacturer Establishes U.S. Headquarters

### Results

09.02.2022

Aerofoam USA, a brand of the family-owned, international firm Hira Industries, today announced plans to establish its United States headquarters and operations in Abbeville County, South Carolina.

Aerofoam USA produces high-quality, sustainable thermal insulation and AeroSound® acoustic solutions for residential, commercial, and industrial buildings. The company specializes in closed-cell thermal insulation materials for condensation control in air conditioning, refrigeration, and chilled water installations, as well as reducing thermal losses in heating and plumbing systems. With a firm commitment to sustainability, the products are free from dust, fibers and asbestos, and have zero ozone depletion impacts.

Located at 43 Commerce Drive in Abbeville, Aerofoam USA's new facility is the company's first operation in North America. The company will manufacture nitril buthene rubber (NBR) for thermal acoustic products utilized in HVAC-R systems, mechanical applications, transport, packaging and more – along with products used by original equipment manufacturers. Operations are expected to be online by May 2023.

Burr & Forman LLP acted as legal counsel to Aerofoam USA on this project.
